#### **Resource Description**

### Exposure: M

weather or climate related pathway by which climate change affects health

Extreme Weather Event, Sea Level Rise

**Extreme Weather Event:** Flooding, Hurricanes/Cyclones

Geographic Feature: ™

resource focuses on specific type of geography

General Geographical Feature

Geographic Location: M

resource focuses on specific location

Non-United States

Non-United States: Europe

European Region/Country: European Country

Other European Country: United Kingdom

Health Impact: M

specification of health effect or disease related to climate change exposure

Infectious Disease, Mental Health/Stress

Infectious Disease: Foodborne/Waterborne Disease

Foodborne/Waterborne Disease: General Foodborne/Waterborne Disease

Mental Health Effect/Stress: Mood Disorder

# Climate Change and Human Health Literature Portal

mitigation or adaptation strategy is a focus of resource

Adaptation, Mitigation

Resource Type: **™** 

format or standard characteristic of resource

Policy/Opinion

Resilience: M

capacity of an individual, community, or institution to dynamically and effectively respond or adapt to shifting climate impact circumstances while continuing to function

A focus of content

Timescale: M

time period studied

Time Scale Unspecified

## Vulnerability/Impact Assessment: ™

resource focus on process of identifying, quantifying, and prioritizing vulnerabilities in a system

A focus of content
